

International Conference on Sustainability in Energy and Buildings

Invited Sessions

Title of Session: Biomass and waste to energy track

Name of Chair: Professeur Abdeslam-Hassen Meniai

Description:

The world policy encouraging recycling and low carbon economy resulted in the development of many treatment processes such as direct firing, cofiring, gasification, anaerobic digestion, etc., of biomass and wastes from various sources to produce energy. The interest in this production route is in a constant rise as shown by the resulting continuous energy growth, during the five past years as well as the expected huge public investments, in many countries.

The Biomass and waste to energy track will be dedicated to examine issues challenging growth in the Biomass and Waste to Energy sectors
